

CIFA S.p.A.-Senago (MI)

TECHNICAL PARAMETERS
TRANSIT MIXER MODEL

SLA9-2R-Ø2300

Disegno N°: Data: 04/11/09

DK01000987 01

Water volume	15940	lt.
Nominal capacity	9	m ³
Water line	10.2	m ³
Filling ratio	56.3	%
Drum speed	0/14	rpm
Drum diameter	2300	mm

Weight of mixer kit refers to CSD version with 300L pressurized water tank
 Weight is inclusive of anchorages and paint.
 Weight does not include mudguards, cyclist bars, rear bar or spare wheel.
 Weights may vary ±5% according to DIN 70200
 Density of concrete is considered 2300 Kg/m

Frame height FH is 180mm

Description	Weight	L (mm)	H (mm)
Mixer tar (Mx)	4466	2895	1100
Concrete (cls)	=V*cd	=m*V+b	=n*V+c

V = volume of concrete [m³]
 cd = concrete density [kg/m³]
 m = -56.58
 b = 3207.38
 n = 61.87
 c = 501.1
